Wednesday, November 17 @ 11:30am

Resident Council Meeting

Monday, November 22 @ 10am

Thanksgiving Happy Hour

Wednesday, November 24 @ 2pm

Family Holiday Party

Friday, December 10, 5:30pm – 7:30pm

November Birthdays

In astrology, those born from November 1–21 are Scorpions of Scorpio. Scorpions are passionate, dedicated, and resourceful. Scorpions may seem intimidating, but they are just no-nonsense people who value honesty and loyalty above all else. Those born from November 22–30 are Archers of Sagittarius. The Archers are the travelers of the zodiac, curious and energetic, with open minds craving new experiences and challenges.

Will Rogers (cowboy) – Nov. 4, 1879

Vivien Leigh (actress) – Nov. 5, 1913

Carl Sagan (astronomer) – Nov. 9, 1934

Tracy Morgan (comedian) – Nov. 10, 1968

Charles, Prince of Wales (royal) – Nov. 14, 1948

RuPaul (model) – Nov. 17, 1960

David Ortiz (ballplayer) – Nov. 18, 1975

Goldie Hawn (actress) – Nov. 21, 1945

Robin Roberts (journalist) – Nov. 23, 1960

Charles Schulz (cartoonist) – Nov. 26, 1922

Chadwick Boseman (actor) – Nov. 29, 1976

Let us welcome....**New Residents**

A very warm welcome to:

- Sue
- Christine
- Judith
- Elizabeth

New Staff

A warm welcome also goes to the people who joined our team in the month of August!

- Taneka (dietary)
- Ruebin (dietary)
- Karla (dietary)
- Mercedes (dietary)
- Aurieli (Nursing)
- Monica (Nursing)
- Lorna (Nursing)
- Soledad (Nurse)

Happy Birthday

- Maria F. (2nd)
- Pyong (11th)
- Bernie (20th)
- Norberto (30th)
- Louise (30th)

Please Welcome our Nurse Soledad Ramos, better known to us as Soli. She's a beautiful soul in and out, and I'm sorry gentlemen but she is taken. She is married and a mother of three beautiful children. The following are her words:

"Growing up I wanted to become a nurse to help my grandparents, so I attended Galen College of Nursing and became an LPN. My plans for the future is to go back to Galen and obtain my RN degree. I love to meet and help people. If you need any help or someone to talk to, I'll be available to listen without judgment. I'm happy to start a new journey with The Crossings and I can't wait to meet everyone".

We are very happy to have you here Soli!!!

Better Off Red

November 5 is Love Your Red Hair Day, and love it while you still can because rumors persist that the recessive redhead gene is causing redheads to go extinct! Luckily, this rumor is not true. Red hair is caused by a mutation of the MC1R gene, which carries instructions for making a protein called the melanocortin 1 receptor. Due to the mutation, this protein creates a type of melanin, or pigment, called pheomelanin, that causes red hair, freckles, and light skin that can burn easily. Because the MC1R gene is recessive (like blue eyes), two parents both have to carry the gene for the possibility of it being expressed in their offspring. With only about 1–2% of the world's population possessing the recessive genes for red hair, some folks worry that the number of redheads will shrink until there are none left. Luckily, even those who do not have red hair may still carry the gene. All it takes is a lucky roll of the genetic dice for red hair to be expressed in an individual. This is why red hair sometimes skips generations and appears years down a family line.

First in Space

On November 3, 1957, a stray dog from the streets of Moscow named Laika made history by becoming the first organism to orbit Earth in outer space, a journey that paved the way for human space flight. In 1957, humanity knew little about the effects of space conditions on organisms. Many scientists believed that living things would not survive the launch off the planet's surface, much less the conditions of outer space. While Laika's trip was always considered to be one way, this did not stop the scientists from growing to love her. Before the launch, one scientist brought her home to play with his children. When Laika was placed inside the rocket capsule, the technician kissed her on the nose. Over the decades since Laika's trip into space, she has become a prominent figure in both Russia's history and popular culture around the world.
